RE Approval of Furnace Removal Work Packages for Buildings 444 and 447 at the Rocky Flats
Environmental Technology Site (RFETS)

Dear Mr Legare

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the "Division") has reviewed the Building 444/447 furnace removal work packages attached to two separate letters from you received on October 23, 2003 and November 19, 2003. These work packages were submitted for Division approval as required by the Division's November 14, 2002 concurrence letter for the typing of Building 444/447 as a type 2 facility. The work packages describe how the RFETS facility plans to disconnect, dismantle and remove the following items:

- eight (8) large vertical vacuum induction furnaces located in rooms 10, 109 and 201 of Building 444,
- the Arc Melt furnace located in room 405 of Building 447,
- the Retch Arc Furnace located in room 405B of Building 447,
- three (3) vacuum furnaces located in Room 403 of Building 447, and
- the Chip Roaster located in Room 32 of Building 447

The Division hereby approves the disconnection, dismantlement, and removal work described in these work packages. These work packages are craft work packages, and thus they do not describe all details of the work steps described therein. Therefore, an active consultative process must continue to be utilized (per the Rocky Flats Cleanup Agreement) to keep us informed of the progress of the work on these furnaces, including any significant problems encountered. If you have any questions regarding this matter please contact James Hindman at (303) 692-3345.

Sincerely,

Steven H. Gunderson
